

# College of Engineering, Construction and Living Sciences Bachelor of Information Technology

ID608001: Intermediate Application Development Concepts Level 6. Credits 15

Project 1: Next.js Hacker News App

#### Assessment Overview

In this **individual** assessment, you will develop an application using **Next.js** and the **Hacker News API**, and deploy it on **Vercel**. The main purpose of this assessment is to demonstrate your ability to develop an application using various taught concepts. In addition, marks will be allocated for code elegance, documentation and **Git** usage.

# Learning Outcome

At the successful completion of this course, learners will be able to:

- 1. Apply design patterns and programming principles using software development best practices.
- 2. Design and implement full-stack applications using industry relevant programming languages.

#### Assessments

Assessment	Weighting	Due Date	Learning Outcomes
Practical: Skills-Based	20%	23-08-2023 (Wednesday at 11.59 AM)	1
Project 1: Next.js Hacker News App	30%	11-09-2023 (Monday at 04.59 PM)	1 and 2
Project 2: Node.js and Express Pub Quiz App	50%	10-11-2023 (Friday at 04.59 PM)	1 and 2

## Conditions of Assessment

You will complete majority of this assessment during your learner-managed time. However, there will be time during class to discuss the requirements and your progress on this assessment. This assessment will need to be completed by Monday, 11 September 2023 at 4.59 PM.

## Pass Criteria

This assessment is criterion-referenced (CRA) with a cumulative pass mark of 50% over all assessments in ID608001: Intermediate Application Development Concepts.

# Authenticity

All parts of your submitted assessment **must** be completely your work. Do your best to complete this assessment without using an **AI generative tool**. You need to demonstrate to the course lecturer that you can meet the learning outcome for this assessment.

However, if you get stuck, you can use an **AI generative tool** to help you get unstuck, permitting you to acknowledge that you have used it. In the assessment's repository **README.md** file, please include what prompt(s) you provided to the **AI generative tool** and how you used the response(s) to help you with your work. It also applies to code snippets retrieved from **StackOverflow** and **GitHub**.

Failure to do this may result in a mark of zero for this assessment.

# Policy on Submissions, Extensions, Resubmissions and Resits

The school's process concerning submissions, extensions, resubmissions and resits complies with Otago Polytechnic — Te Pūkenga policies. Learners can view policies on the Otago Polytechnic — Te Pūkenga website located at <a href="https://www.op.ac.nz/about-us/governance-and-management/policies">https://www.op.ac.nz/about-us/governance-and-management/policies</a>.

## **Submission**

You **must** submit all project files via **GitHub Classroom**. Here is the URL to the repository you will use for your submission – <a href="https://classroom.github.com/a/T9vHopU9">https://classroom.github.com/a/T9vHopU9</a>. Create a **.gitignore** and add the ignored files in this resource - <a href="https://raw.githubusercontent.com/github/gitignore/main/Node.gitignore">https://raw.githubusercontent.com/github/gitignore/main/Node.gitignore</a>. The latest project files in the **master** or **main** branch will be used to mark against the **Functionality** criterion. Please test before you submit. Partial marks **will not** be given for incomplete functionality. Late submissions will incur a **10% penalty per day**, rolling over at **5:00 PM**.

# **Extensions**

Familiarise yourself with the assessment due date. If you need an extension, contact the course lecturer before the due date. If you require more than a week's extension, a medical certificate or support letter from your manager may be needed.

## Resubmissions

Learners may be requested to resubmit an assessment following a rework of part/s of the original assessment. Resubmissions are to be completed within a negotiable short time frame and usually **must** be completed within the timing of the course to which the assessment relates. Resubmissions will be available to learners who have made a genuine attempt at the first assessment opportunity and achieved a **D grade (40-49%)**. The maximum grade awarded for resubmission will be **C-**.

#### Resits

Resits and reassessments are not applicable in ID608001: Intermediate Application Development Concepts.

#### Instructions

You will need to submit an application and documentation that meet the following requirements:

# Functionality - Learning Outcomes 1, 2 (50%)

- Application:
  - Display a drop down with the following options:

- \* Ask Stories
- \* Best Stories
- \* Job Stories
- \* New Stories
- \* Show Stories
- \* Top Stories
- The endpoints for the stories are as follows:
  - \* Ask Stories https://hacker-news.firebaseio.com/v0/askstories.json?print=pretty
  - \* Best Stories https://hacker-news.firebaseio.com/v0/beststories.json?print=pretty
  - \* Job Stories https://hacker-news.firebaseio.com/v0/jobstories.json?print=pretty
  - \* New Stories https://hacker-news.firebaseio.com/v0/newstories.json?print=pretty
  - $*\ Show\ Stories\ -\ https://hacker-news.firebaseio.com/v0/showstories.json?print=pretty$
  - $* \ Top \ Stories \ https://hacker-news.firebaseio.com/v0/topstories.json?print=pretty$
- When an option is selected, display the title of the first 40 stories.
  - \* Style each story to look like a card using CSS Modules or Tailwind CSS.
  - \* Display five stories per row.
- When a story is clicked, the user will be navigate to a page that displays the following information:
  - \* By
  - \* Kids. **Note:** This is an array of ids. If the array is empty, display **N/A**. Display the first five ids as URLs in this format: https://hacker-news.firebaseio.com/v0/item/<Id>.json?print=pretty. When clicked, these URLs will open in a new tab.
  - \* Score
  - \* Time. **Note:** Convert the time to a readable format.
  - \* Title
  - \* Type
  - \* URL. **Note:** When clicked, this URL will open in a new tab.

This information is fetched from the following endpoint:

https://hacker-news.firebaseio.com/v0/item/<Id>.json?print=pretty.

- On a page, display the top 20 leaders. You can get this information from the following URL: https://news.ycombinator.com/leaders. Note: You need to manually retrieve the information from the URL.
- When a leader is clicked, the user will be navigate to a page that displays the following information:
  - \* About
  - \* Created. **Note:** Convert the time to a readable format.
  - \* Id
  - \* Karma
  - \* Submitted. **Note:** This is an array of ids. Display the first 10 ids as URLs in this format: https://hacker-news.firebaseio.com/v0/item/<Id>.json?print=pretty.

This information is fetched from the following endpoint:

https://hacker-news.firebaseio.com/v0/user/<Id>.json?print=pretty.

Deployed your application on Vercel.

#### • Testing:

- Component tests are written using React Testing Library and Jest.
- 15 **component tests** verifying the app functionality.

#### • Scripts:

- Run your component tests using React Testing Library and Jest.
- Lint and fix your code using **ESLint**.
- Format your code using Prettier.

# Code Elegance - Learning Outcome 1, 2 (40%)

- A Node.js .gitignore file is used.
- Appropriate naming of files, variables, functions and components.
- Idiomatic use of control flow, data structures and in-built functions.
- Efficient algorithmic approach.
- Sufficient modularity.
- Each **component** and **page** file has a **JSDoc** header comment located immediately before the **import** statements.
- In-line comments where required. It should be for code that needs further explanation.
- Code is linted and formatted using **ESLint** and **Prettier**.
- React Testing Library, Jest, ESLint, Prettier and Committizen are installed as development dependencies.
- No dead or unused code.

## Documentation and Git/GitHub Usage - Learning Outcomes 1, 2 (10%)

- A GitHub project board to help you organise and prioritise your work.
- Provide the following in your repository **README.md** file:
  - A URL to your application on **Vercel**.
  - How do you setup the environment, i.e., after the repository is cloned, what do you need to do before you run the application?
  - How do you run your application locally?
  - How do you run your **component tests**?
  - How do you lint and fix your code?
  - How do you format your code?
- Use of Markdown, i.e., headings, bold text, code blocks, etc.
- Correct spelling and grammar.
- Your Git commit messages should:
  - Reflect the context of each functional requirement change.
  - Be formatted using an appropriate naming convention style using **Commitizen**.

#### **Additional Information**

Do not rewrite your Git history. It is important that the course lecturer can see how you worked on your assessment over time.
