ID608001: Intermediate Application Development Concepts

Project 1: Next.js Hacker News App Marking Rubric

	10-9	8-7	6-5	4-0
Functionality	The application contains comprehensive and robust evidence on the following functionality: Application, Testing and Scripts.	The application contains clear and detailed evidence on the following functionality: Application, Testing and Scripts.	The application contains evidence on the following functionality: Application, Testing and Scripts.	The application does not or does not fully contain evidence on the following functionality: Application, Testing and Scripts.
Code Elegance	The application demonstrates comprehensive evidence on the following: • A Node.js .gitignore is used. • Appropriate naming. • Idiomatic use of control flow, data structures and in-built functions. • Efficient algorithmic approach. • Sufficient modularity. • Commenting, linting and formatting. • React Testing Library, Jest, ESLint, Prettier and Commitizen are installed as development dependencies. • No dead or unused code.	The application demonstrates clear evidence on the following: • A Node.js .gitignore is used. • Appropriate naming. • Idiomatic use of control flow, data structures and in-built functions. • Efficient algorithmic approach. • Sufficient modularity. • Commenting, linting and formatting. • React Testing Library, Jest, ESLint, Prettier and Commitizen are installed as development dependencies. • No dead or unused code. The application does not or does not fully demonstrate evidence on the following: • A Node.js .gitignore is used. • Appropriate naming. • Idiomatic use of control flow, data structures and in-built functions. • Efficient algorithmic approach. • Sufficient modularity. • Commenting, linting and formatting. • React Testing Library, Jest, ESLint, Prettier and Commitizen are installed as development dependencies. • No dead or unused code.

Documentation & Git Usage	Comprehensive use of project board on GitHub. README file contains comprehensive evidence on the following: • A URL to app on Vercel. • Setup the environment. • Run your application locally. • Run your component tests. • Lint and fix your code. • Format your code. • Use of Markdown. • Spelling and grammar correctness. Git commit messages comprehensively formatted using Commitizen and reflect the changes in concise detail.	Clear use of project board on GitHub. README file contains clear evidence of: • A URL to app on Vercel. • Setup the environment. • Run your application locally. • Run your component tests. • Lint and fix your code. • Format your code. • Use of Markdown. • Spelling and grammar correctness. Git commit messages clearly formatted using Commitizen and reflect the changes in substantial detail.	Use of project board on GitHub. README file contains evidence of: • A URL to app on Vercel. • Setup the environment. • Run your application locally. • Run your component tests. • Lint and fix your code. • Format your code. • Use of Markdown. • Spelling and grammar correctness. Git commit messages formatted using Commitizen and reflect the changes in detail.	Does not or does not full demonstrate use of project board on GitHub. README file does not or does not fully contain evidence of: • A URL to app on Vercel. • Setup the environment. • Run your application locally. • Run your component tests. • Lint and fix your code. • Format your code. • Use of Markdown. • Spelling and grammar correctness. Git commit messages are not or are not fully formatted using Commitizen and do not or do not fully reflect the changes.
